

CC in the Cloud Technical Community (Cloud-TC) – Meeting Minutes

7:39 AM PST 2024-02-28

Call to Order: 0801
Meeting Lead: Joshua BRICKMAN
Attendees: 20
Member Count: 71
Next Meeting: Wednesday March 20th, 2024

Highlights:

- Voting period has concluded, results are in favor of approving the Guidance document for release.
- New bi-weekly meeting cadence to commence on Wednesday March 20th due to EU Cyber Acts conference.

Old Business:

- Review of previous meeting minutes by Garrett N.

New Business:

- Voting period has concluded, results are as follows:
 - o 49 unique organizations had voting rights
 - o A total of 9 votes were received (18% participation)
 - o No two votes received were from the same organization
 - o All 9 votes received (100%) were for “Approve”, no votes were received for “Approve but noticed Fatal Flaw”, and no votes were received for “Do Not Approve”.
- A Final cleanup of the document by Brandon H and Josh B was conducted.
 - o Minor issues were resolved such as table of contents, margins, page numbering etc. These items were identified after physically printing the document on paper and conducting an overall review.
- Brandon has now published the Guidance document on the “cc-in-the-cloud.github.io” page
- Discussion on some additional language that Josh drafted to post in a new section on our TC page in the CC portal to reference the cc-in-the-cloud.github.io page
- Jade S advised she had spoken with an NSA member, whom suggested the inclusion of a Google Cloud example is needed in addition to the existing Amazon, Azure, and Oracle examples within the Guidance document. Google cloud is prevalent in France, so this update would provide greater coverage and raise fewer questions during the CCDB review.
 - o Josh B pointed out that the Cloud-TC has not had any active contributors or participation from Google, therefore capturing and documenting instructions and diagrams to include in this release of the Guidance document would be difficult.

CC in the Cloud Technical Community (Cloud-TC) – Meeting Minutes

- Josh B suggested that an issue should be logged to track this suggestion so that we can engage with Google and include a Google Cloud example in a future iteration.
- A Bi-weekly meeting cadence will continue as we start to receive feedback, addressing new issues, and begin working on the next iteration of the Guidance document.
 - EU Cyber Acts Conference will be occurring in two weeks, so our next meeting will be cancelled and the new bi-weekly cadence will start on March 20th.
- Jade indicated that the CCDB generally will return feedback on these types of document review requests within 30 days.

Questions/Follow-ups:

- Josh to follow up with CCUF leadership to see if a joint session will be held per Brian Wood's survey regarding a possible spring session in Berlin, Germany.

End of Meeting – Adjourned 0846 PST
