

CC in the Cloud Technical Community (Cloud-TC) – Weekly Meeting Minutes

7:52 AM PST 2024-01-10

Call to Order: 0804
Meeting Lead: Joshua BRICKMAN
Attendees: 18
Member Count: 73
Next Meeting: Wednesday January 17th, 2024

Highlights:

~

Old Business:

~

New Business:

- Josh B discussed the current status of the Guidance Document and that we are approaching completion. A vote to publish this initial version of the Guidance Document for public comment will be held once the last few issues in GitHub have been addressed.
 - o Once the Guidance Document has been released for public comment, we will reduce our meeting cadence to bi-weekly and will start working on issues tagged as “future”.
- Reviewed open issues in GitHub.
 - o Reviewed Issue #117 *“Threats in cloud operating environment”*
 - Tagged “wont fix” and comment closed due to lack of response from author on additional information and actionable materials.
 - o Reviewed Issue #118 *“Deployment Model”*
 - Tagged “wont fix” and comment closed due to lack of response from author on additional information and actionable materials.
 - o Reviewed Issue #112 *“CCITC Guidance for Cloud Evals Minor feedback/suggestions”*
 - Tagged “To incorporate” pending addition of language to Guidance Document.
 - o Reviewed Issue #132 *“Editorial Comments 9 Jan 24 (CCITC Guidance dated 2 Jan 24)”*
 - Tagged “To incorporate” pending implementation into Guidance Document.
- Brandon H presented updates and progress to the Guidance Document.
 - o Issue #106 *“Guidance for Schemes”*
 - Change implemented, issue closed.
 - Discussion on section “Guidance for Establishing Test Environments on Cloud Infrastructure” and whether a separate section for Lab Guidance on creating cloud environments for testing. Much of the input on this topic will need to come from schemes on what requirements a test environment in the cloud will have to meet. This will require further discussion and collaboration within the Cloud-TC community in addition to Labs and Schemes. No further amendments to the current Guidance document will be made at this time.
 - o Issue #127 *“Editorial comments”*

CC in the Cloud Technical Community (Cloud-TC) – Weekly Meeting Minutes

- Implementation is ongoing
 - Issue #128 “*Cloud Composition wording*”
 - Change implemented, issue closed
 - Issue #116 “*Trusted Platform and TOE platform*”
 - Change implemented, issue closed
- Discussion on proposal to have output format of the Guidance Document be ISO compliant.
 - This would include a major overhaul of the document format to adhere to ISO requirements such as restrictions on where italics are used, number of allowed sub-headers, etc.
 - Tyrone S suggested there would be little value for this document to undergo such an overhaul at this time.
 - Brandon H used a tool to convert the guidance document to a rough draft ISO style format for members on the call to review side by side with the current pdf version and discuss some additional features that we might want to consider such as section numbering, and compliance for viewing on multiple devices etc.

Questions/Follow-ups:
