CC in the Cloud Technical Community (Cloud-TC) – Meeting Minutes

7:39 AM PDT 2024-03-20

Call to Order:	0801
Meeting Lead:	Joshua BRICKMAN
Attendees:	20
Member Count:	71
Next Meeting:	Wednesday April 3rd, 2024

Highlights:

~

Old Business:

- Review of previous meeting minutes by Garrett N.

New Business:

- Discussion on vote results and overall participation.
    - Josh B issued an anonymous poll in Zoom to collect information on those that voted vs those that did not, and the high-level reasons for not voting.
    - Several members shared that they had simply forgotten about the vote deadline.
- Discussion on the submission of the Guidance document to the CCDB for review.
    - Jade S indicated that she was not aware of the document being submitted to the CCDB as of yet, however she has spoken with both Matt D and Jon R.
    - Josh B advised he will reach out to Matt D and Jon R again for an update.
- Tyrone S provided a brief update on the results of his presentation at the EU Cyber Acts conference which discussed the work of the CC in the Cloud TC.
    - Jade S confirmed that slides and presentation recordings from the conference are available for download.
- Justin F will be presenting at the upcoming CSfC conference and will be discussing the work of the CC in the cloud TC.
- Reviewed open issues:
    - Issue #143 "For completeness, add Google to TOE identification section".
        - The Guidance document contains examples from three of the four major cloud providers (AWS, Azure, and Oracle). Adding Google cloud would provide better coverage.
        - Jade S has contacted a google participant in ISO/IEC SC38 Cloud Computing to see if she could find someone at Google to provide information for this section of the Guidance document.
        - Anne G advised that Google has two products listed as FedRAMP Authorized and one product entering the process soon.

CC in the Cloud Technical Community (Cloud-TC) – Meeting Minutes

- Josh B pointed out that the UI's of each CSP are going to change regularly and therefore the guidance and screenshots we include will likely go out of date very quickly.
- Andy N suggested that this section be more generic in order to address particular CSP coverage, since this will amount to a constant effort to maintain the accuracy and consistency of changing UI's, etc.
- Brandon H pointed out that some level of detail is needed in order to appropriately demonstrate the information required with respect to how the TOE should be uniquely labeled and identified.
- Anne G provided the link to *marketplace.fedramp.gov/products* which was reviewed in real time to gather information on other cloud platforms that would be considered a trusted cloud service provider in the USA, as an example.
    o Issue #142 "Include Azure in Table of Contents"
        - Azure is missing from the ToC and needs to be included.
        - Brandon H advised that this will be updated and reposted on the github.io page ASAP.

Questions/Follow-ups:

- Josh B to follow up with Matt D and Jon R regarding submission of the Guidance document to the CCDB for review.

End of Meeting – Adjourned 0857 PDT
