CC in the Cloud (CCitC) Technical Working Group – Weekly Meeting Minutes

7:42 AM PDT 2023-10-04

Call to Order: 0800
Meeting Lead: Joshua BRICKMAN
Attendees: 27
Member Count: 72
Next Meeting: Wednesday, October 11th, 2023

Highlights:

~

Old Business:

- The CCUF MDM/Mobility in the Cloud session has been moved to another time and is no longer a conflict with our workshop days.

New Business:

- Josh discussed a draft for agenda for the workshop during CCUF and will hopefully be released next week.
- Reviewed the current list of attendees for the workshop and confirmed with several members on the call whether they'd be attending in person or not.
- Jade S & Matt D provided an updated on the NIAP MDM Working Group.
    - o Matt advised that the guidance document is still under review, some delays were experienced due to the potential government shutdown. There are still several comments from other reviewers in the doc that need to be addressed before the doc is released. The review should be complete by next week and the guidance document will be released or an updated timeline will be communicated on when it will be released.
- Josh advised that there seems to be a perception by an individual that the CCitC group is focused heavily on US-centric scenarios, and not considering other groups or schemes in the EU.
    - o This is not the case, therefore we need to be open with any messaging, particularly at the upcoming CCUF and ICCC meetings, that we are more than welcome to accept participation from all groups and schemes including those in the EU.
- Josh led a review of the remaining open issues in GitHub and tagged any issues that members wanted to tackle during the upcoming workshop.
    - o Issue #105 'TOE is never defined' is now closed (this was resolved previously but not closed)
    - o Issue #101 'Trusted Platform Details' is now closed (resolved previously)
    - o Issue #96 'AGD for Cloud' – Tagged for Workshop
    - o Issue #76 'Common Cloud Topology's and the abstraction layer' is now closed, no longer relevant to our direction.
    - o Issue #74 'Lab/Evaluator Instructions' – Tagged for Workshop
    - o Issue #73 'Scope of Cloud operating environment claims' – Tagged for Workshop

CC in the Cloud (CCitC) Technical Working Group – Weekly Meeting Minutes

- Issue #72 'Audience Clarification – Main Guidance and Guidelines for Optimising existing Protection Profiles' - Tagged for Workshop
