

CC in the Cloud Technical Community (Cloud-TC) – Meeting Minutes

7:41 AM PDT 6/4/2025

Call to Order: 0802
Meeting Lead: Joshua BRICKMAN
Attendees: 15
Member Roster: 74
Next Meeting: Wednesday July 2nd, 2025

Highlights:

~

Old Business:

- Review of previous meeting minutes by Garrett N.
- Tyrone S confirmed submission of Cloud-TC material to ISO in response to the Call for Contributions regarding the incorporation of cloud and zero trust use cases into 'TOE Concept' definition.

New Business:

- Josh announced that communication was made with the Australian scheme regarding the status of addressing their comments.
 - o The scheme responded with some additional feedback and questions which were further discussed.
 - o Discussion on CSP service offerings that have been CC evaluated. So far, only Microsoft Intune has achieved this at this point, although many products have been evaluated by CSP hyper-scalers such as OS's and VM's.
 - o Discussion on the opportunity and possibilities of CSP hyper-scalers to have software service offerings CC evaluated. While possible today, the Cloud-TC strongly recommends the approach of updating relevant PP's and CPP's to add cloud use cases before evaluating such services/products. For example, MDM PP has been in the process of drafting updates for cloud-based TOE's.
 - o Discussion on the potential for open-source TLS libraries to be CC evaluated independently, and then used by CSP's or organizations within their products and services. This has not been achieved based on current information and understanding. If a NIAP PP is being claimed, the TLS functional package can be claimed and ACVP certs must be obtained.
 - o A call will be offered to the Australian scheme to review CCitC responses and guidance updates relating to their comments and feedback.
- Brandon provided an overview of the updates made to the Guidance document in preparation for the next official release.
 - o Consensus was reached that the totality of changes is minor in nature. The Terms of Reference were reviewed to confirm an official vote and voting period was not required for minor updates, prior to public release.

CC in the Cloud Technical Community (Cloud-TC) – Meeting Minutes

- An oral vote was conducted with those in attendance on the approval and release of the next version of the Guidance document. Of the 15 members present on the call:
 - 14 members approved
 - 1 member (Jade S) abstained
 - No oppositions identified
- A monthly meeting cadence will continue and the next meeting will be July 2nd.

Questions/Follow-ups:

~

End of Meeting – Adjourned 0859 PDT
