

CC in the Cloud Technical Community (Cloud-TC) – Meeting Minutes

7:46 AM PST 12/11/2024

Call to Order: 0800
Meeting Lead: Joshua BRICKMAN
Attendees: 14
Member Roster: 83
Next Meeting: Wednesday January 8, 2025

Highlights:

~

Old Business:

- Review of previous meeting minutes by Garrett N.

New Business:

- Brandon H has created an “Overview” section in the Guidance Document to better describe the purpose and overall goals of the document. Brandon presented this section and several minutes were provided for members on the call to review in real time.
 - o Discussion on the new “Overview” section
 - Jade S pointed out that references to data sovereignty and multi-tenancy may not be addressed by technical controls in either CC or FedRAMP, and that some important topics and assumptions don’t seem to be addressed by the document or pointed out in general.
 - Alicia S conducted a quick search and found that multi-tenancy is referenced in a few controls including AU-06 for Audit and Accountability.
 - Alicia S also pointed out that in the USA, multi-tenancy is likely to be most directly covered in the DOD Cloud Service Provider SRG: <https://public.cyber.mil/dccs/dccs-documents/> particularly 5.2.2.3 which specifies that virtual/logical separation is allowed at IL5 between DOD and federal gov tenants, but physical is required from non-DOD/non-federal. That same SRG section speaks to data sovereignty too: *“All Impact Level 5/NSS data must remain under U.S. jurisdiction or in U.S. Territories or geographic locations where there is U.S. jurisdiction.”* Alicia suggested this framework should be referenced as an example.
 - Brandon updated several paragraphs in real time to address Jades comments and Alicia’s findings.
 - See GitHub issue #183 *“30K Foot Overview Intro Section”*
- Reviewed GitHub Issue #152 *“German Scheme Feedback: CPU Equivalency”*
 - o Discussion around the use of Jitter in user space and the evaluation process of entropy sources.
 - o Section *“Jitter Entropy”* in the Guidance document has been revised to address concerns in this comment.

CC in the Cloud Technical Community (Cloud-TC) – Meeting Minutes

- Tyrone S has started triaging the comments and feedback from the Australian Scheme and will be further looked into and discussed in the new year.
- An updated Guidance Document that incorporates updates resulting from German scheme feedback will be released in early 2025.
- Next meeting will be cancelled due to the Christmas holidays. Regular meetings will resume on January 8th, 2025.

Questions/Follow-ups:

~

End of Meeting – Adjourned 0859 PST
