

CC in the Cloud Technical Community (Cloud-TC) – Meeting Minutes

7:37 AM PDT 10/29/2025

Call to Order: 0800
Meeting Lead: Joshua BRICKMAN
Attendees: 12
Member Roster: 75
Next Meeting: Wednesday February 25, 2026

Highlights:

~

Old Business:

- Review of previous meeting minutes.

New Business:

- Josh gave a brief review of ICCC, which concluded last week.
 - o Heavy on EUCC topics and presentations.
 - o True bilateral mutual recognition is still a complex issue
 - Since the CCRA is an “arrangement”, in order for there to be greater recognition, there needs to be a strong agreement among international participants. This will involve parliamentary buy-in and approval from the EU which could take substantial amounts of time.
 - Some certs have already been issued and other pilots are underway.
 - Tyrone clarified that the CRA (Cyber Resilience Act) is ultimately the EU requirement that needs to be fulfilled, and EUCC may be one way to achieve that.
 - o No CCitC update was presented at CCUF/Joint session, however several other ITC’s mentioned or referenced CCitC in their future roadmaps.
- Discussion on the US government shutdown and its impact to NIAP including the updating of protection profiles for CC2022.
 - o Josh mentioned the end of year deadline related to starting evals against CC 3.1 R5 PP’s
 - o Garrett shared a link to a new NIAP Labgram #122 which states “*NIAP will continue to accept evaluations against all CC v3.1 PPs and PP-Configurations up until three weeks prior to the sunset date of the PP and the earliest sunset date of the components of the PP-Configuration.*” Effectively extending this deadline to provide additional time for PP’s to be updated for CC2022.
- Discussion on the new TLS package.
 - o Much more complex than the previous version. Some test cases cannot be adequately met or are not possible.
- Brandon and Tyrone both gave talks at ICCC related to CCitC.
 - o Brandon presented on the general concept of the Cloud-TC and what work has been accomplished over the last couple years.

CC in the Cloud Technical Community (Cloud-TC) – Meeting Minutes

- Tyrone presented on the Virtualization and GPOS PP's and what updates could be done for those based on Cloud-TC guidance. He also proposed that it may be time to start an iTC to address GPOS PP, and given the complexities of the application of Virtualization PP in the cloud, that perhaps containerization is a valid candidate for a new PP.
- Discussion on the usage of an older OSPP still in active use in Germany.
- Further updates to our guidance document will continue once additional feedback from schemes and PP authors is received. Many iTC's and PP authors are prioritizing the transition to CC2022 which is causing a delay on incorporating cloud specific modifications and adoption of Cloud-TC guidance.
- Josh proposed, without objection, that future meeting cadence will be reduced to quarterly and the next Cloud-TC meeting will be scheduled for February 2026. An updated meeting invite will be sent out to all current Cloud-TC members following this meeting.

Questions/Follow-ups:

- Josh to send out updated meeting invite for quarterly cadence.

End of Meeting – Adjourned 0859 PDT
