- Josh advised he has submitted a request to Matt Downey and Jon Rolf to post the new Guidance document to the CC Portal, however there has not been an update or response as of yet.
 - o Jade advised that Jon and Matt will be participating in CCDB meetings this week so another week may be needed in case there are relevant discussion items resulting from those meetings.
- Discussion on incorporation of Cloud into CC particularly with the release of CNSS 11.0 and the inclusion of “Services”.
 - o Tyrone commented that while some changes are needed, the concept of product vs service is still relatively the same. And PP’s should still be updated before full support of cloud products and evaluations can take place.
- Work will now resume in triaging Australian Scheme feedback.
 - o Reviewed Issue #170 “*Australian Scheme Feedback: (p9) Responsibilities*”
 - Brandon and Jade have provided comment responses which were reviewed.
 - Josh presented the referenced section in the guidance document.
 - In general, this is the schemes responsibility to determine the minimum acceptable criteria for SaaS offerings that can or cannot qualify for CC evaluations.
 - Further consideration will be given to adding an appendix or separate supporting document that addresses additional optional environmental security mechanisms should the trusted platform be missing such items.
 - Tagged as “Enhancement”
 - o Reviewed Issue #171 “*Australian Scheme Feedback: (p10 and p11) Administrator Guidance Documentation (AGD)*”
 - Clarification needed on whether this comment is referring to a PII (privacy) issue or security issue, and what the overall motivation behind this question is to better understand it.
 - o Reviewed Issue #172 “*Australian Scheme Feedback: (p9) Responsibilities*”
