

CC in the Cloud Technical Community (Cloud-TC) – Meeting Minutes

7:50 AM PDT 8/7/2024

Call to Order: 0803
Meeting Lead: Joshua BRICKMAN
Attendees: 16
Member Roster: 83
Next Meeting: Wednesday August 21st, 2024

Highlights:

~

Old Business:

- Review of previous meeting minutes by Garrett N.

New Business:

- Feedback on the Guidance document has been received from the German scheme. Jade S will follow up to confirm if additional comments are expected from the CCDB.
- Erin C raised an issue on expanding the language suggesting additional skillsets or employees may be needed to deal with cloud evals to also include suggested training for current employees, and the types of training that might be relevant.
- Todd H & Brandon H commented on some challenges, including the acquisition of resources with the required skillsets, to perform evaluations in the cloud.
 - o In many cases even those with a cloud admin skillset may not be best suited for CC eval work in the cloud.
- Discussion around the PCL posting of Microsoft Windows on Azure Stack.
 - o Shaun G advised that Azure Stack is a 'cloud on-prem' solution for deployment, so this evaluation was not actually conducted in the cloud.
- Josh B discussed the feedback from the German scheme on the guidance document.
 - o 33 different comments were submitted.
 - o Josh B has created an issue in GitHub for each comment.
- Began triaging the new issues
 - o Issue #147 *"German Scheme Feedback – Evaluation of the Shared Security Model"*
 - Suggestion to genericize the language since multiple other elements may be required in the future.
 - Tagged as 'Editorial' and 'To Incorporate'.
 - o Issue #148 *"German Scheme Feedback: Relationships Among the TOE, TOE Platform, and the Trusted Platform"*
 - Discussion on the relevance of the TOE platform providing functionality to the TOE.
 - In several other PP's there are selections available to "invoke platform provided functionality", thereby allowing for this scenario conceptually.

CC in the Cloud Technical Community (Cloud-TC) – Meeting Minutes

- This section of the guidance references Protection Profiles specifically, so a revision of the language here to clarify the differences between the PP and OE may be required.
- Tagged as 'Question', 'To Incorporate', and 'Documentation'.
- Issue #149 *"German Scheme Feedback: Guidance for Evaluators"*
 - The intended meaning of 'integrity' aligns with the NIST definition: *"Guarding against improper information modification or destruction, and includes ensuring information non-repudiation and authenticity"*.
 - Tagged as 'Question'.
- Issue #150 *"German Scheme Feedback: TOE Identification"*
 - Discussion on the current content of the Guidance document and the examples that already exist, however there is room for improvement on giving more explicit examples of the actual listing as it would appear in an ST.
 - Assigned to Brandon to provide a formal response.
 - Tagged as 'Question'.
- Issue #151 *"German Scheme Feedback: Cloud Equivalence Considerations"*
 - The guidance is intended to refer to the acceptance criteria for cloud authorizations, as determined by individual schemes. The existing sentence will be updated to explicitly state this.
 - Assigned to Brandon to correct a spelling error.
 - Tagged as 'Documentation'.

Questions/Follow-ups:

- Jade S to confirm if additional comments from the Guidance document review are expected from the CCDB.

End of Meeting – Adjourned 0859 PDT
