

CC in the Cloud Technical Community (Cloud-TC) – Meeting Minutes

7:46 AM PDT 9/3/2025

Call to Order: 0801
Meeting Lead: Joshua BRICKMAN
Attendees: 18
Member Roster: 75
Next Meeting: Wednesday October 29th, 2025

Highlights:

~

Old Business:

- Discussion on previous meeting and reviewed items discussed:
 - o NIAP NICE event and key takeaways
 - o Major work being done on App software CPP with a potential SaaS module
 - o ChatGPT comments on the guidance document
 - o Level of detail necessary in the guidance doc. Previously it was intended to be enough for PP authors to make decisions, however there has been some discussion that more detail is needed.

New Business:

- Database iTC (DBMS) is working on several updates including CC2022 integration, Crypto, and authoring a new 'collaborative PP-Module for DBMS in the Cloud' based on the Cloud-TC guidance. Brandon is working on this and presented some of the work being done by DBMS-iTC.
 - Module applies to databases that are to be installed on public cloud infrastructure. The threat model for this is different than the lift-and-shift model given the change in shared-security model. Ultimately this impacts the Security Problem Definition and is the reason for a dedicated PP-Module being developed.
 - First draft is publicly available on the DBMS-iTC GitHub page and open for comments (<https://github.com/DBMS-iTC>)
- A poll was conducted on the call to gather information on who would be attending ICC3 in October. 75% of those on the call will not be attending this year.
- Justin discussed NIAP's goal of updating all NIAP PP's for CC2022 and referred to the Common Criteria GitHub page (github.com/commoncriteria) for current status of updated PP's.
- Josh has submitted a request to Matt Downey asking for an update the CC Portal Technical Communities page for CC in the Cloud. This is to update the Guidance Document section and refer to the "third" version of the document being available (not second).
- The Cloud-TC meeting on September 24th is canceled. The next meeting is scheduled to resume on October 29th after ICC3.

Questions/Follow-ups:

~
